

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class FixedResoultion {
        - Start()
        - ResolutionFix()
    }
    FixedResoultion --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'FixedResoultion' class, represented by a grey box with a black border and two compartments. The top compartment of 'FixedResoultion' contains the class name, and the bottom compartment contains two methods: '- Start()' and '- ResolutionFix()'. A blue arrow with an open triangular head points from the 'FixedResoultion' class up to the 'MonoBehaviour' class, indicating inheritance.

FixedResoultion

- Start()
- ResolutionFix()
